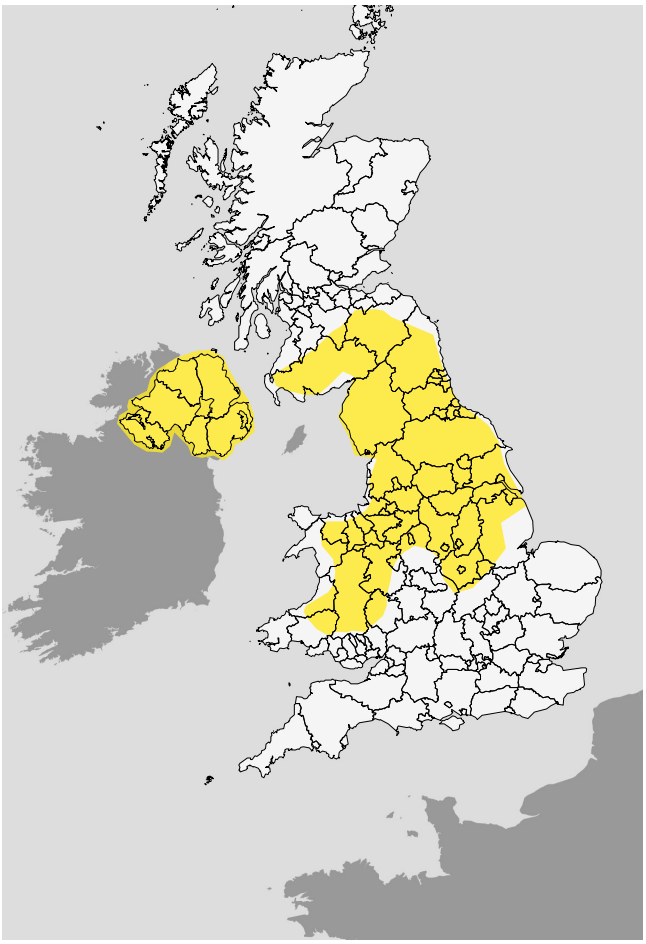
Yellow warning
Ice

Between
09:30 Fri 10 Mar 2023 and
10:00 Sat 11 Mar 2023



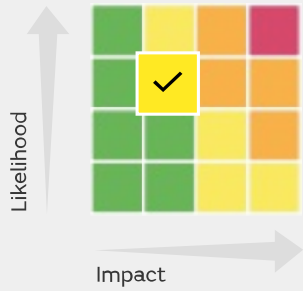
Ice is likely to be a hazard where snow has fallen overnight

What to expect

- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Whilst falling snow will clear from the south and east of the warning area in the next few hours, lying snow and ice will likely continue to be a hazard through the rest of this morning. Icy stretches should become confined to higher ground this afternoon, before temperatures fall below freezing widely this evening. This will lead to untreated surfaces left wet by snow melt becoming icy at all levels, with some disruption to travel likely.



Medium likelihood of low impacts

Issued at 09:30 Fri 10 Mar, 2023
